Docket No. 98N-1265

I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

COMMENTS: I am extremely sensitive to chemicals and it is absolutely vital that I receive my meds from a pharmacy that specializes in me as an individual, based on my unique health needs. I have had severe reactions to regular prescriptions, and trying to find personalized care has been a time of stress and unreleaved suffering. I am now stabilized and doing very well with my compounded prescriptions.

We need to maintain the freedom to let our health choices be between the patient and the doctor, and not be decided (controlled) by the government.
